The Heart tor And

What is a Heart Attack? - American Heart Association

What is a Heart Attack? A heart attack most commonly results from atherosclerosis (fatty buildups) in the arteries that carry blood to the heart muscle. Plaque buildup narrows the inside of the arteries, making it harder for blood to flow. If a plaque in a heart artery ruptures (breaks open), a blood clot forms. The clot further blocks the

Heart Look Like? Your Heart

As your heart beats, it pumps blood through a system of blood vessels called the circulatory system. Arteries carry oxygen-rich blood from your heart to the rest of your body. Veins return blood to your heart. When blood returns to your heart, it carries waste gas called

Coronary Heart Disease - NHLBI, NIH

A heart attack occurs when blood flow to an area of your heart muscle is completely blocked. This prevents oxygen-rich blood from reaching that area of heart muscle, causing it to die. Without quick treatment, a heart attack can lead to serious problems or death. Over time, CHD can weaken the heart muscle and lead to heart failure and
